

GETTING STARTED WITH PYTHON

Environmental Statistics

PYTHON FOR BEGINNERS

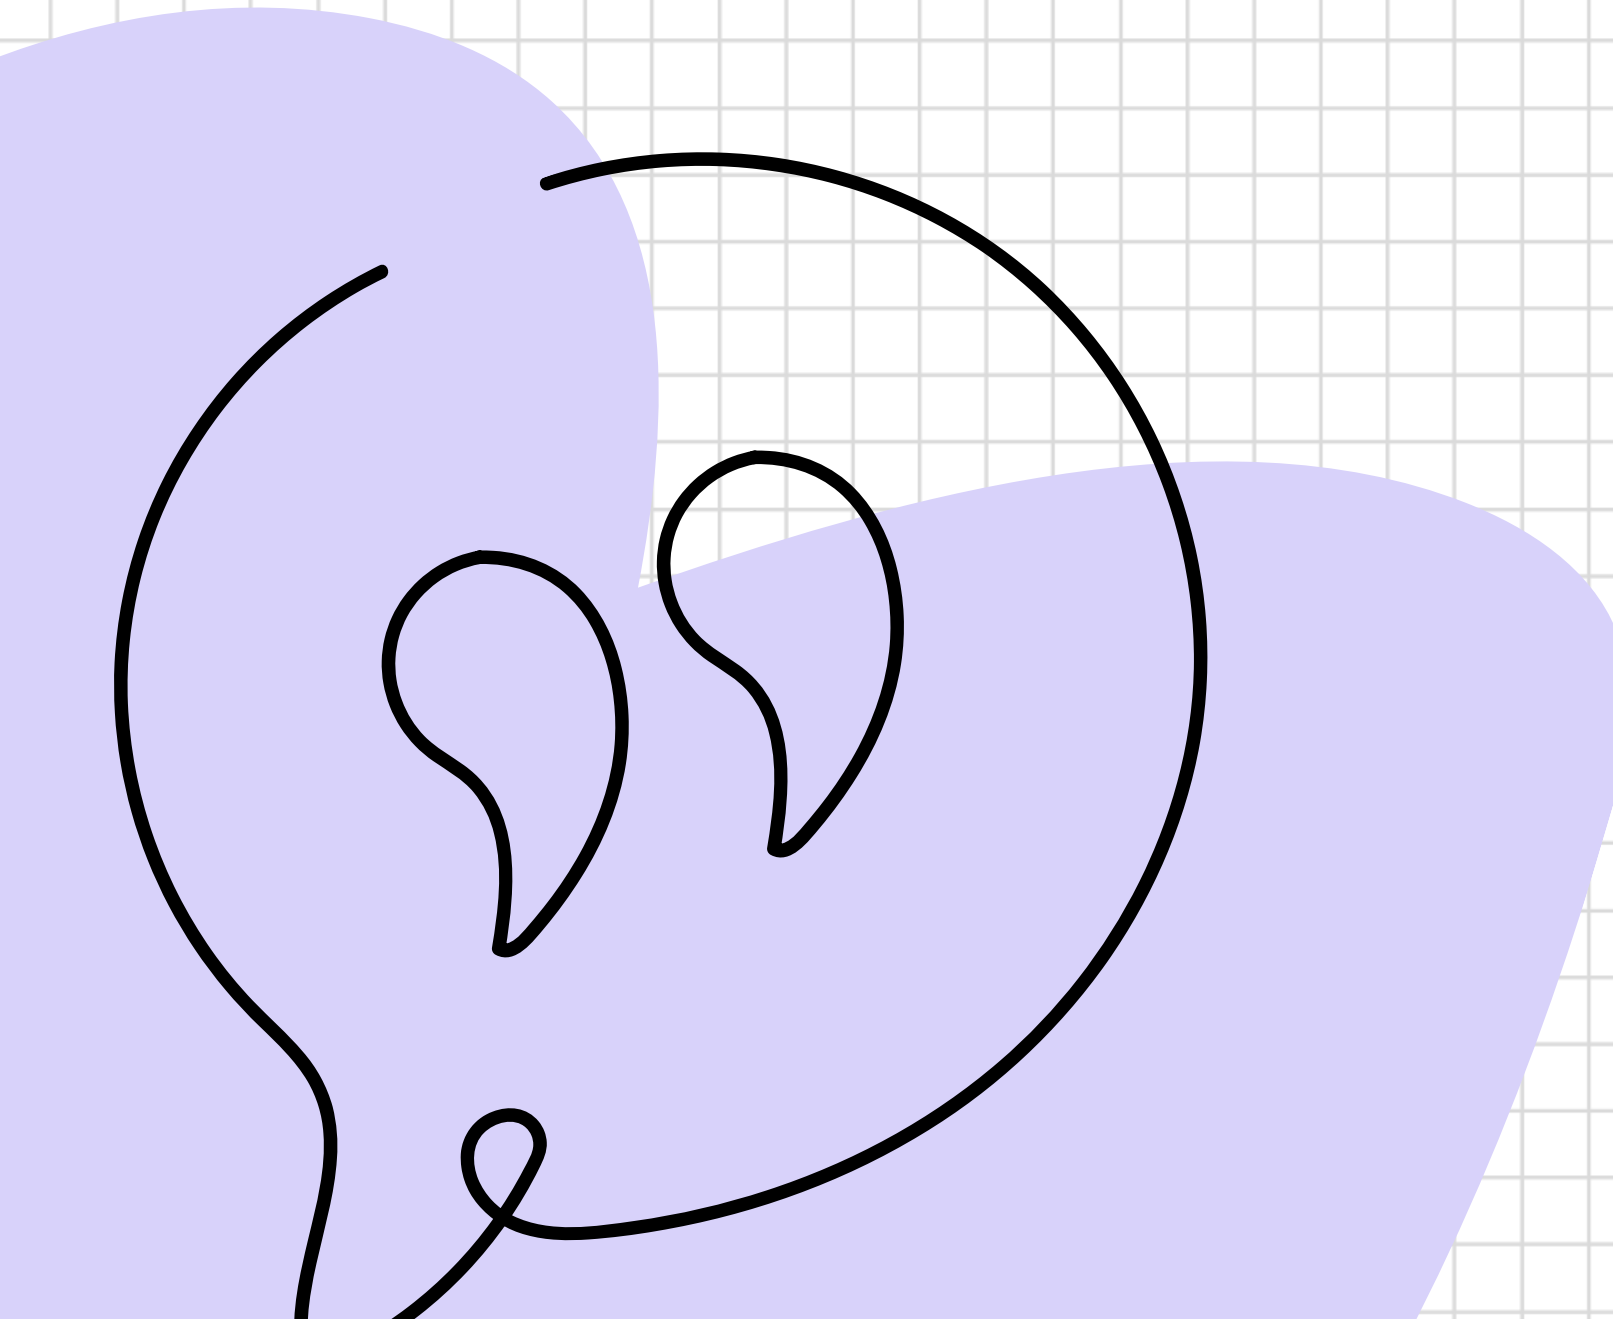

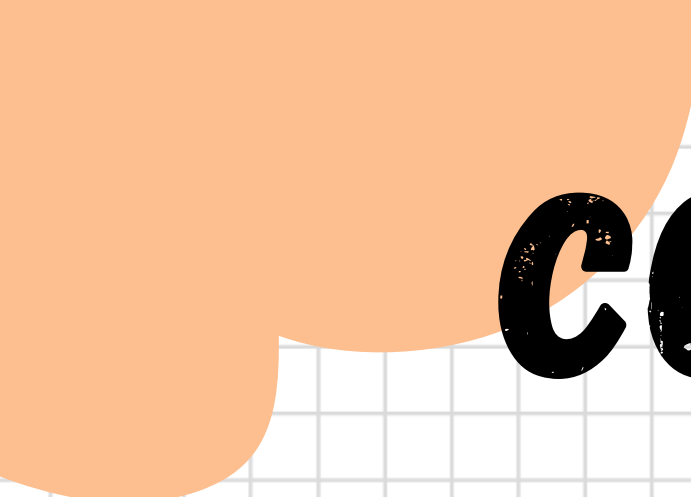

REQUIREMENTS

- Basic Computer literacy
- Operating System
- Internet Connection
- Passion to Learn
- No Prior Programming Experience
- Adequate Storage Space

WHAT TO LEARN

- Python Basic
- Anaconda Overview
- Jupyter Notebook
- Variables and Data Types
- Control Structures
- Loops
- Functions
- Data Structures
- Data Visualization

CONTENTS

1. Download anaconda distribution
2. Create an environment
3. Activate environment and install packages
4. Launch jupyter notebook/lab
5. Import your libraries
6. Variables and data types
7. If, elif, and else statements
8. Loops and functions
9. Data loading, cleaning, manipulations and visualizations
